Table Top Size Recommendations

Bolt-Down

The recommended maximum size restriction is 36" x 42", based on the premise that one person will sit at the end of the 42" length. Doing so limits the torque on the floor bolts when using the table top for support.

For a 36" width top, two people sitting on one side of the table also limits the torque on the floor bolts should they need support in rising from the table.

Increasing the width or length beyond the recommended one fixed base per 36" x 42" top may cause too much torque on the floor bolts. However, an additional base/s can help support longer tops, or one base per 42".
